k. **Description of Request:** In conjunction with necessary spillway stabilization work, the applicant intends to replace the existing wooden flashboards at the Blewett Falls development with a pneumatic crest gate system. The proposed crest gate would consist of 9 sections of various height, but would have the same maximum elevation as the existing flashboards. The applicant also proposes to construct a 21-foot-wide, 24-foot-long concrete control building near the spillway as part of the crest gate system. The applicant intends to install the system beginning in November 2020, and complete construction in November 2021. Additionally, the applicant proposes changes to the conceptual designs for fish passage structure referenced in U.S. Fish and Wildlife Service's fishway prescriptions, which would provide downstream American Shad and upstream American eel passage at the Blewett Falls dam.
